- Questions to ask when reading graphs:
- Is there an upward or downward trend?
  - Are there any sudden spikes in the graph?
  - What is being compared in the graph?
  - What prediction can I make for the future?
  - What inferences can I make about the graph?

Analyze the graphs below and write a reflection on what you think the graphs are communicating to you. To guide you with your response, start with some observations.

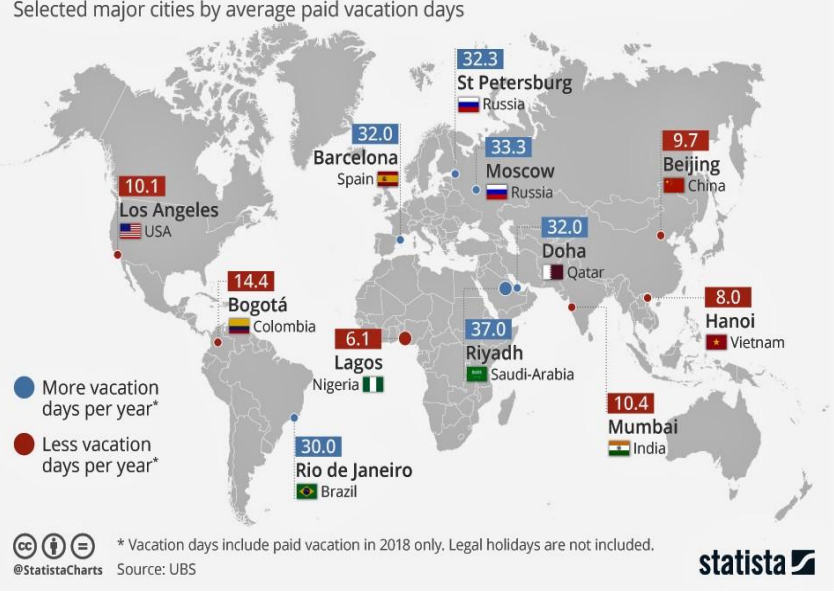

- What is the topic of each graph?
- What does the x-axis represent? What does the y-axis represent?
- What are some observations that you can make based on the graph?
